Science

Plants

- As the world turns it looks like the position of the sun moves throughout the day.

- Flowers and plants grow from seeds or bulbs.

- Flowers and plants need certain conditions to be able to grow.

- Weather Forecasters are able to predict weather patterns.

Seed	The small part of a flowering plant that can grow into a new plant
Stem	The stem transports water around the plant. It also holds the plant upright so it can get more sunlight
Root	Roots absorb minerals and water from the soil. The roots also help the plant anchor in the soil and stay upright
Plant	A living thing that grows in one place such as an oak tree, a sunflower or a tomato plant
Leaf	Leaves make food for the plant from carbon dioxide in the air and sunlight.
Seedling	A young plant, after a seed has germinated
Germinate	When a seed begins to grow into a seedling
Bulb	A store of a plant that lives underground
